- 1) Do u have cloud deployment exp?
- 2) Which protocol is used in Restfull API
- 3) What are all the methods used Rest?
- 4) Difference between Put and Post
- 5) Different between Rest and Soap Services
- 6) Have u worked in SOAP Services
- 7) What are the new features used in Java 8
- 8) What is functional interface?
- 9) What is ~~that~~ ^{try with resource} in Java 7
- 10) Syntax of "try with resource"
- 11) What is the reason for using abstract class?

15) How good R U in collections
interface / ^{Explain} interface / Array / Int / Linked list
16) What scenario have U used linked

list
17) How will U retrieve/store the data
multiple
^

12) Diff between interface and abstract

13) What is the scenario do you use abstract class

14) Have U used marker interface

in the linked list

18) How will U remove duplicate in array list

19) Other collections used? Hash map vs Hash table

20) Synchronization - ?

- 21) What is immutable class?
- 22) Example of immutable class.
- 23) What is wrapper class?
- 24) Have you used design pattern? Scenario used.
- 25) Commonly used annotation in Spring Boot
- 26) Diff between @Controller and @RestController
- 27) @ResponseBody - what is default message
- 28) @RequestMapping and @GetMapping difference
- 29) Default annotation - Spring Boot
- 30) @ExceptionHandler - what is it?
- 31) Manual conf in Spring MVC - What are the drawbacks
- 32) How will you conf DB in Spring Boot
- 33) Diff env/diff DB - where do you configure

- 34) Have you used any monitoring tool?
- 35) How will you configure actuator?
- 36) Have you used custom endpoints in actuator
- 37) How do you exclude endpoints in actuator
- 38) Have you faced CORS issue?
- 39) How do you fix it
- 40) White label error
- 41) How did you ^{do} error control in the project
- 42) What is the UI layer
- 43) What is the security layer used between FE and Services layer
- 44) What is the part in Angular & did you use?
- 45) How do you component in Angular
- 46) Have you worked in JS
- 47) How do we implement router?
- 48) How services are called from Angular
